

PHD IN BIOMEDICINE

PREDOCTORAL FPI CONTRACT

The Laboratory of Molecular Physiology at the Department of Experimental and health Sciences of the Pompeu Fabra University (Barcelona) opens a call to fill a FPI contract and carry out a PhD in Biomedicine.

Title of the Project: Mechano/osmosensitive ion channels in epithelia, cancer and asthma.
Funded: SAF2015-69762R

Requirements: Candidates must have obtained a University Degree and a Master's Degree in natural or medical sciences (Biology, Medicine, Biochemistry, Biomedicine, Chemistry, Physics, Bioengineering, etc) within the European Higher Education System (minimum 300 ECTS), or an equivalent university degree that would allow the candidate to start a PhD thesis in their home country by September 2016. Candidates who expect to be awarded with such degree by September 2016 are eligible to apply.

Candidates are advised to check that they fulfill the requirements for admission to the UPF PhD in Biomedicine

<https://www.upf.edu/phd-biomedicine/admission/requirements.html> as candidates who do not fulfill these requirements will be considered ineligible.

Pre-selected candidates will be required to present their academic record.
Candidates must have excellent academic qualifications and good command of English.

Previous research experience and authorship scientific publications will be a plus.

Candidates from any nationality are eligible.

Initial enquiries and CV can be sent to Miguel Angel Valverde (miguel.valverde@upf.edu) by 18th March 2016.
